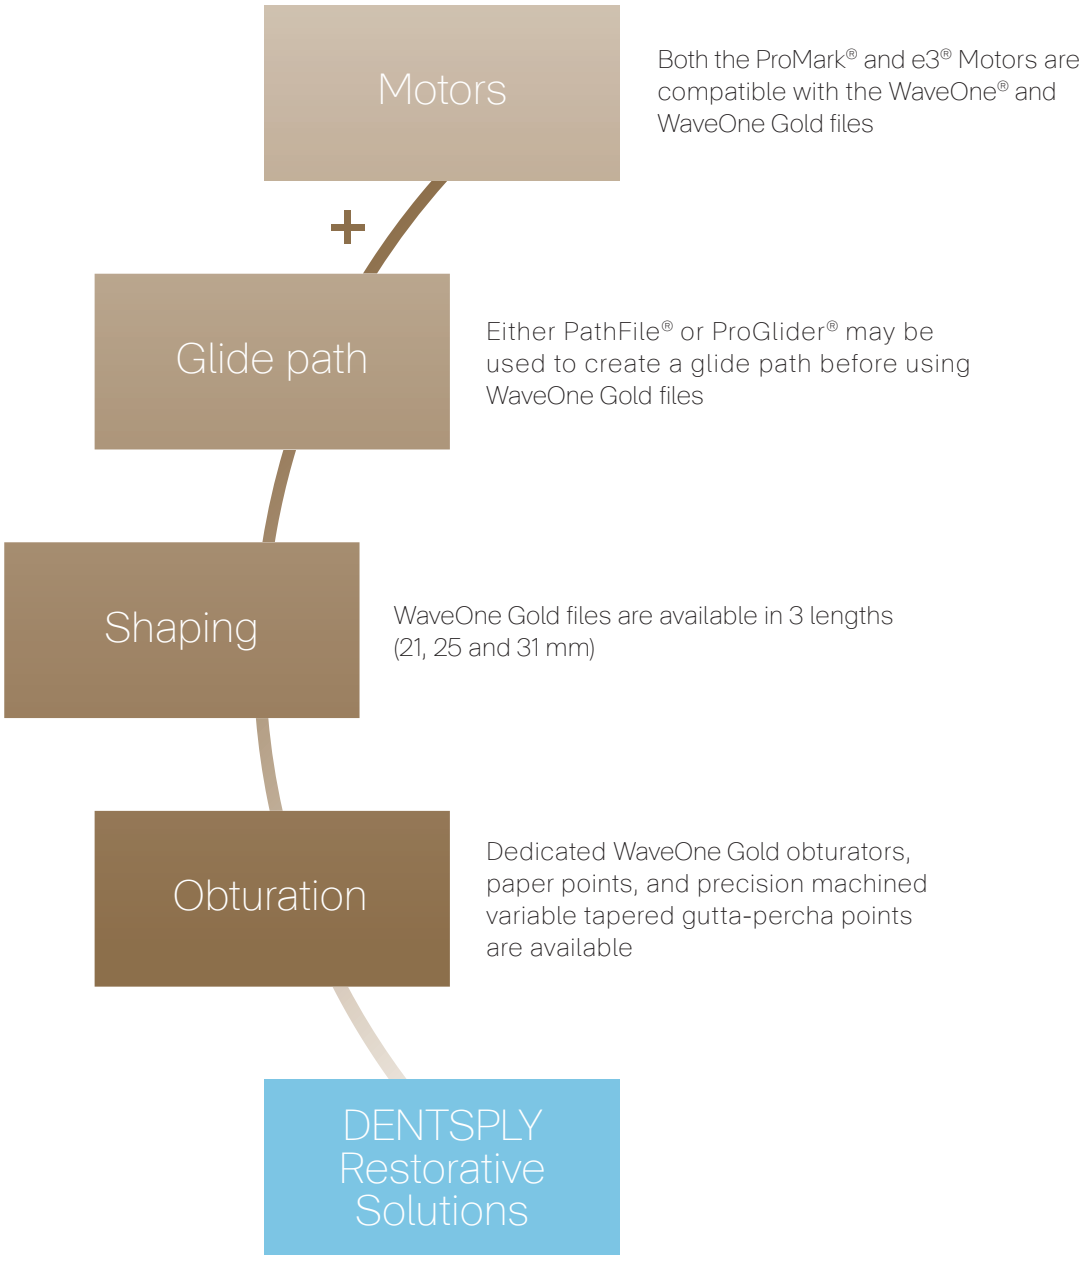
Surf the canal with confidence

wave•one® GOLD

One complete solution

With WaveOne® Gold, DENTSPLY Tulsa Dental Specialties promotes a comprehensive treatment solution and optimizes predictable, successful outcomes

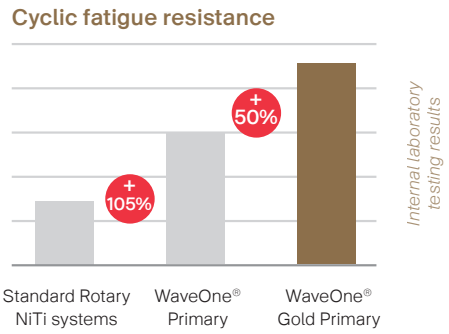


Keeping the WaveOne® **simplicity** with a **golden** host of benefits

wave•one® GOLD

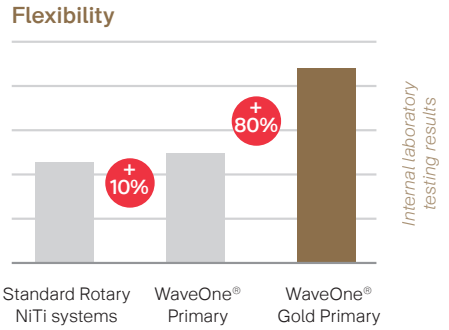
1 Reinforces patient safety

- Primary WaveOne® Gold file is 50% more resistant to cyclic fatigue than WaveOne Primary file
- Reduced screwing effect compared to standard rotary systems



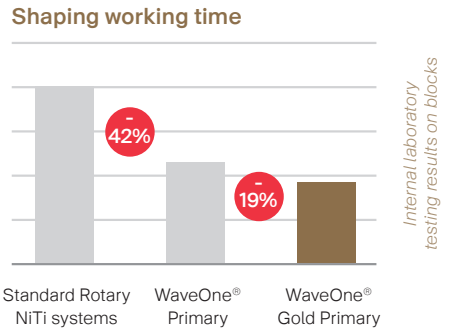
2 Covers a wider range of canal morphologies

- Enhanced file flexibility thanks to the Gold technology
- Extended size range (Small, Primary, Medium, Large)



3 Shortens the shaping time

- Takes the cutting efficiency to a higher level
- A single file per treatment also translates into time savings for canal shaping and irrigation



Engineered with the latest **reciprocating technology**

DENTSPLY Tulsa Dental Specialties has teamed up with the best endodontic professionals to develop WaveOne® Gold

The design team speaks

Dr. C. Ruddle, Dr. J. Webber, Dr. W. Pertot, Dr. S. Kuttler

Shaping canals has never been easier.

Since its launch in 2011, DENTSPLY Tulsa Dental Specialties' WaveOne® has set a new standard in root canal shaping. All around the world general dentists and endodontists have voiced their appreciation of the simplicity WaveOne brings to their efforts to provide quality endodontic treatment to their patients.

We have been working on a new and exciting WaveOne project to bring you WaveOne Gold.

WaveOne Gold brings to the endodontic procedure a metallurgically advanced single-file technique for shaping canals. Further, we optimized the tip diameters, tapers, and the cross-section to produce a file that really improves safety, efficiency and flexibility when preparing canals. WaveOne Gold takes simplicity and treatment success to another level.

Simplicity that enables treatment focus

The majority of root canals can be shaped with a single WaveOne® Gold Primary file

PROGLIDER
ROTARY GLIDE PATH FILES

Glide path preparation

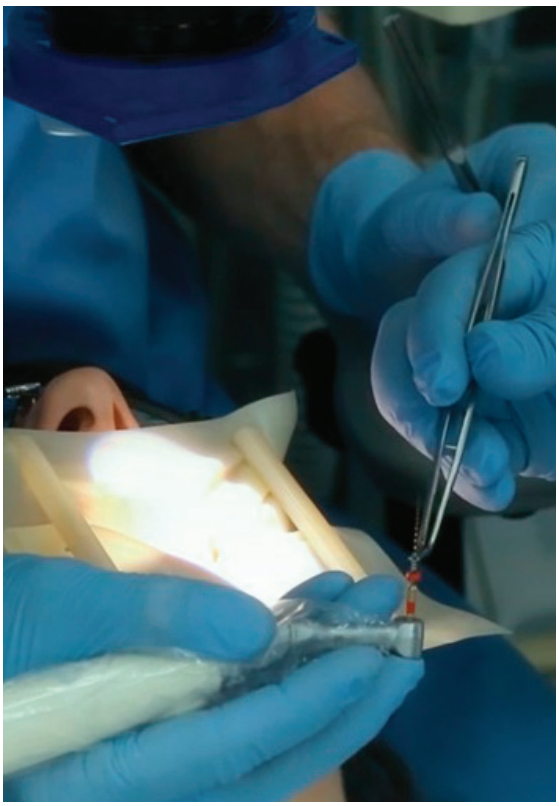
SMALL 20/.07

PRIMARY 25/.07

recommended for most root canals

MEDIUM 35/.06

LARGE 45/.05



Ready-to-use + Single use

Most dental practitioners have the twofold aim of reducing overall treatment costs while improving safety and efficiency. With this in mind, WaveOne Gold files are supplied in sterilized blister packs. Dentists will benefit from:

- Simplicity, thanks to the ready-to-use sterile packaging
- Increased safety margin, by always using files with maximum fatigue resistance potential
- Reduced risk of cross-contamination, which can occur when instruments are reused
- Maximized cutting efficiency
